## Corporate Partnership Opportunities

## Corporate Partnerships

The International Association of Women in Fire & Emergency Services (iWomen) is “*the voice of women in fire and emergency services*”. Our mission is to provide leadership, training and representation to enhance the professionalism of all women in fire and emergency services careers.

iWomen believes strongly in the development of mutually beneficial strategic partnerships as it is through these relationships that iWomen is able to fund key initiatives that support our mission. In turn, our corporate partners gain significant visibility and recognition with our members and other industry leaders.

We have created different partnership packages each uniquely designed to provide your organization with a direct link to our diverse membership which includes chief officers, company officers, firefighters and EMS professionals representing career, wildland and volunteer departments.
